

Dr. William D. Provine

Dr. William D. Provine is currently the Science Director of the Biochemical Science and Engineering – BioFuels division of Central Research and Development at DuPont. In his current role, Dr. Provine has global responsibility for biofuels research programs within DuPont that includes critical biotechnology programs in the DuPont Knowledge Center in Hyderabad, India as well as other major DuPont research centers around the world. Dr. Provine also serves on the board of directors for Butamax Advanced Biofuels LLC and on the Technical Steering Committee for DuPont Danisco Cellulosic Ethanol LLC – two key joint ventures of DuPont focused on the commercialization of next generation biofuel technologies. External to DuPont, Dr. Provine serves on a number of advisory boards including the steering committees of the Joint BioEnergy Institute, Great Lakes BioEnergy Research Center, and BioEnergy Science Center. He joined DuPont in 1992 and has served in a variety of research, marketing, business development, and operations leadership roles including oversight for commercialization efforts in DuPont BioFuels. Dr. Provine also has managed key strategic collaborations around the world for DuPont in emerging technologies such as nanotechnology, biomaterials, and biofuels with companies, universities, government agencies, and non-profit organizations. Dr. Provine graduated from the University of California, Berkeley and the University of Delaware, where he received B.S. and Ph.D. degrees in Chemical Engineering in 1987 and 1992.
